Each student needs MANY modules

```
┌─────────────────┐                              ┌─────────────────┐
│                 │                              │                 │
│    student      │>─────────────────────────────<│    module       │
│                 │                              │                 │
└─────────────────┘                              └─────────────────┘
```
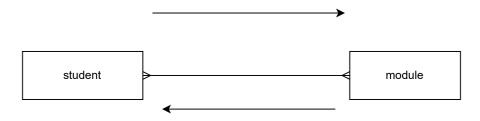

Each module needs to have MANY

Real Situation: A minimum number of students need to
enrol for a module to run...roughly 10 students. Each full
time student will need to enrol in a minimum 6 modules
